

WORLD WILDLIFE ARCHIVES

FOR NATURE, FOR PEOPLE, FOREVER

100
COUNTRIES
All over the world

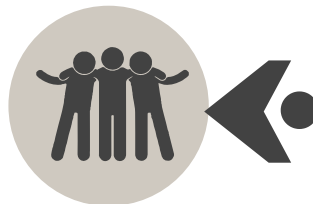

MISSION

- Preserves records related to WWF's mission to protect the world's most vulnerable species and ecosystems, address climate change, and promote sustainable resource use.
- Documents WWF's history, initiatives, partnerships, and advocacy efforts for environmental conservation.

WHO ARE WWF ?

- For more than 60 years, WWF has worked to help people and nature thrive.
- As the world's leading conservation organization, WWF works in nearly 100 countries. At every level, we collaborate with people around the world to develop and deliver innovative solutions that protect communities, wildlife, and the places in which they live.
- WWF aids local communities in conserving natural resources, transforming markets and policies for sustainability, and protecting species and habitats. It connects conservation science with partners, aiming to address the greatest threats to life on Earth and protect the natural resources that sustain us.

“THE IMPORTANCE OF THE ARCHIVES”

The World Wildlife Fund (WWF) Archive is a crucial resource that preserves the history and impact of WWF's global conservation efforts. It contains valuable research data on endangered species, ecosystems, and climate change, supporting scientific study and policy advocacy. Serving as an educational tool, it raises public awareness of environmental issues and inspires future conservationists. Additionally, the archive documents WWF's partnerships and contributions to global environmental policies, ensuring accountability, transparency, and a lasting legacy in biodiversity conservation and climate action.

COLLECTIONS:

- Houses documents, reports, and publications on a wide range of conservation topics, including endangered species, habitat protection, climate change, and community-based conservation projects.
- Contains photographs, videos, press releases, and campaign materials showcasing WWF's global conservation projects and public awareness campaigns.
- Includes significant research and field data gathered over the decades from WWF's scientists, ecologists, and partner organizations worldwide.
